

Aqua save Intelligent Water Flow Regulator

This Regulator is inserted into a tap outlet of a **Monobloc Basin Mixer**, a typical version of which is shown here. It allows full water flow until the discharge rate reaches 5 litres per minute. Once the flow rate is reached, it will not be exceeded.

This Regulator must only be used with a tap which has a metal screened thread opening.

No need to turn off the water supply. Simply fitted with a spanner.

Aqua save Intelligent Water Flow Regulator

Use these Washers to: A - replace the washers used in between the threaded tails of basin taps and the flexible braided connecting hoses, and/or B - replace the washer inserted in between a shower head and the connecting hose. Subject to the selected version, the washer allows full water flow until the discharge rates reach 6, 8 or 10 litres per minute. Once the flow rate is reached, it will not be exceeded.

Simply fitted with a spanner where used with a tap and by hand where used for a shower head.

Aqua save **Flow Rate Switch for Shower**

Lo - Hi & Hi - Lo Flow Rate Switch

This switch, also known as an Eco Booster is designed to allow the user to switch between high and low flow rates. It automatically resets to low and is supplied with 1/2" threads to enable its in line installation. When switched to the low flow rate, it will deliver a maximum of 8 litres of water per minute. It is ideal when a reduced flow rate of water is required for example when applying shampoo.

No need to turn off the water supply.
